

It's all new

Restaura

Restaura represents everything that active aging and senior living dining services must become to meet the high expectations of today's aging population. We've combined a culture rooted in employee ownership with a data-driven operating model to deliver exceptional culinary experiences like never before. Our purpose-built mission will breathe new life into an industry ripe for innovation. This is the future.

Culinary commitment

Our flexible dining experiences bring elevated quality, concierge-inspired personalization, and culinary variety together with data science for the first time. Fresh food, responsive menu planning, and culinary excellence combine to create elevated dining experiences that are as unique as each individual we serve.

Technology-forward

Our leadership team has imagined new ways to embed technology into every facet of dining services to optimize client success, resident experiences, and operational efficiencies. Our predictive demand planning minimizes waste and maximizes freshness. And we've created digital dashboards that arm our clients with real-time KPI tracking.

Shared ownership

At Restaura, every employee—from kitchen staff and servers to corporate team members—shares a combined ownership stake of over 30% in the company. This innovative model not only addresses the industry's high turnover rates, but also fosters a work environment where each team member feels valued and empowered to exceed expectations.

Importantly, Restaura is exclusively focused on active aging and senior living dining. If you're ready to explore the future, please reach out to us at: 1-833-573-7828 or visit www.restaura.com
